

Cyber Security Platform

A versatile Cyber Security Platform was developed as a offshore product development engagement for a UK based company, to assist a wide range of users in maintaining their digital assets. This platform is designed to be user-friendly and manageable remotely, eliminating the need for in-depth Cyber Security knowledge.

Challenges

- **Complexity:** Cyber Security has become more complex and crucial.
- **Vulnerabilities:** Digital assets face threats from internet, networks, and Wi-Fi.
- **Users Affected:** Individuals, enterprises, IT Admins, MSPs need reliable protection.
- **Awareness:** Non-experts struggle with risk awareness and threat management.
- **Cost:** Solutions available are very costly.
